TRACEABILITY VISION

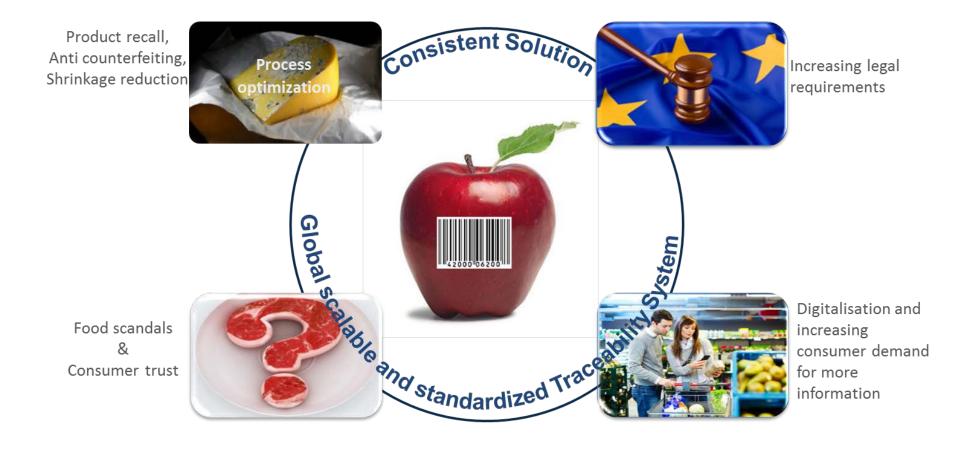

METRO GROUP works towards a "Global Standard Traceability solution (GSTS)" as a

- new robust and scalable general traceability approach
- applicable to food and non-food products on
- an internationally harmonized level,
- covering sustainability and safety aspects, but also advanced marketing, efficient recall handling and anti-counterfeiting.

This system should be strictly based on open global standards to ensure global interoperability, avoidance of cost caused by spreading island-solutions and best use of modern technology.
