

Hlutverk MSC og markmið samtakanna

Sjávarútvegsráðstefnan 2018

Gísli Gíslason

Senior Program manager, North Atlantic

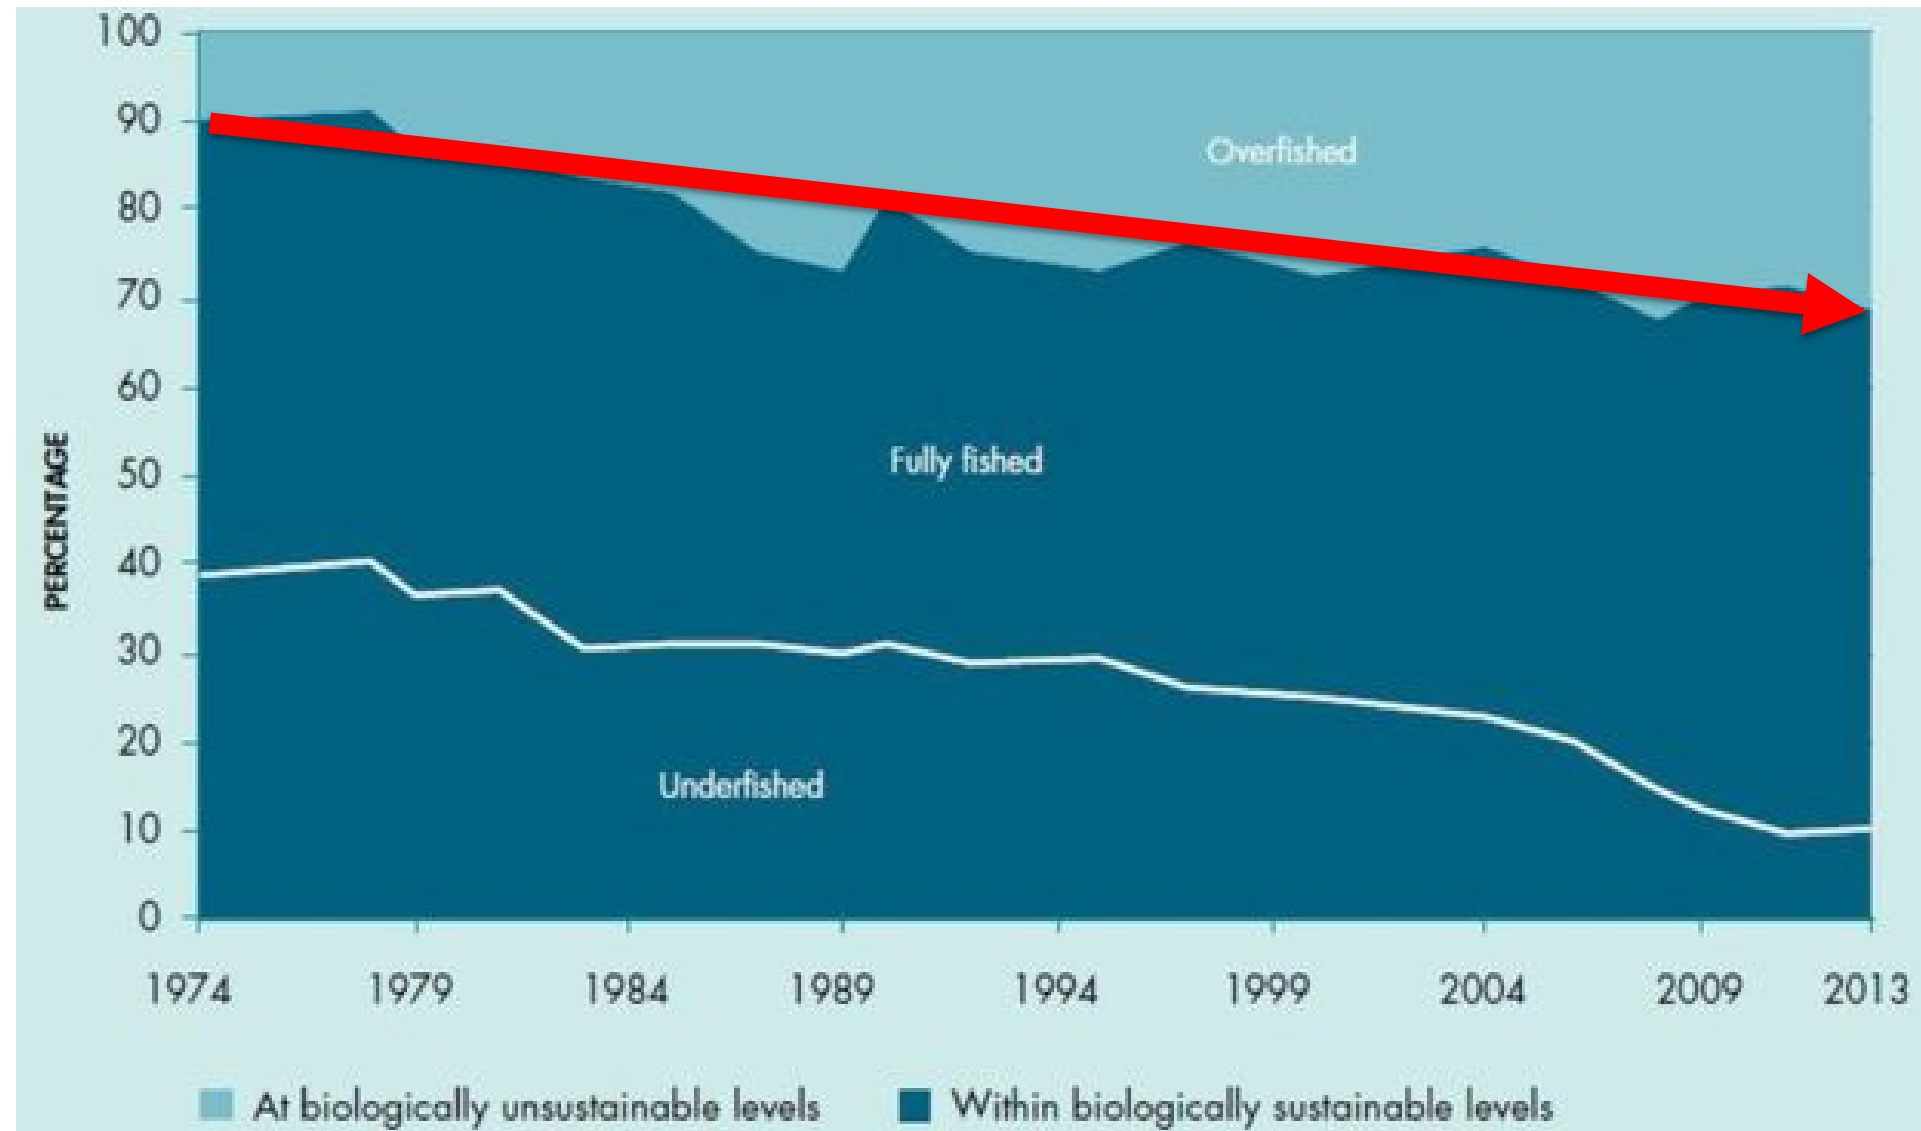

Stuðla að sjálfbærum fiskveiðum

Our **vision** is of the world's oceans teeming with life, and seafood supplies safeguarded for this and future generations.

Our **mission** is to use our **ecolabel** and **fishery certification program** to contribute to the health of the world's oceans by recognising and rewarding sustainable fishing practices, influencing the choices people make when buying seafood and working with our partners to transform the seafood market to a sustainable basis.

20 years of impact in MSC certified fisheries

The MSC certification program recognises, rewards, and incentivises sustainable fishing around the globe. This map highlights just a few of the improvements that certified fisheries have made since 1997.

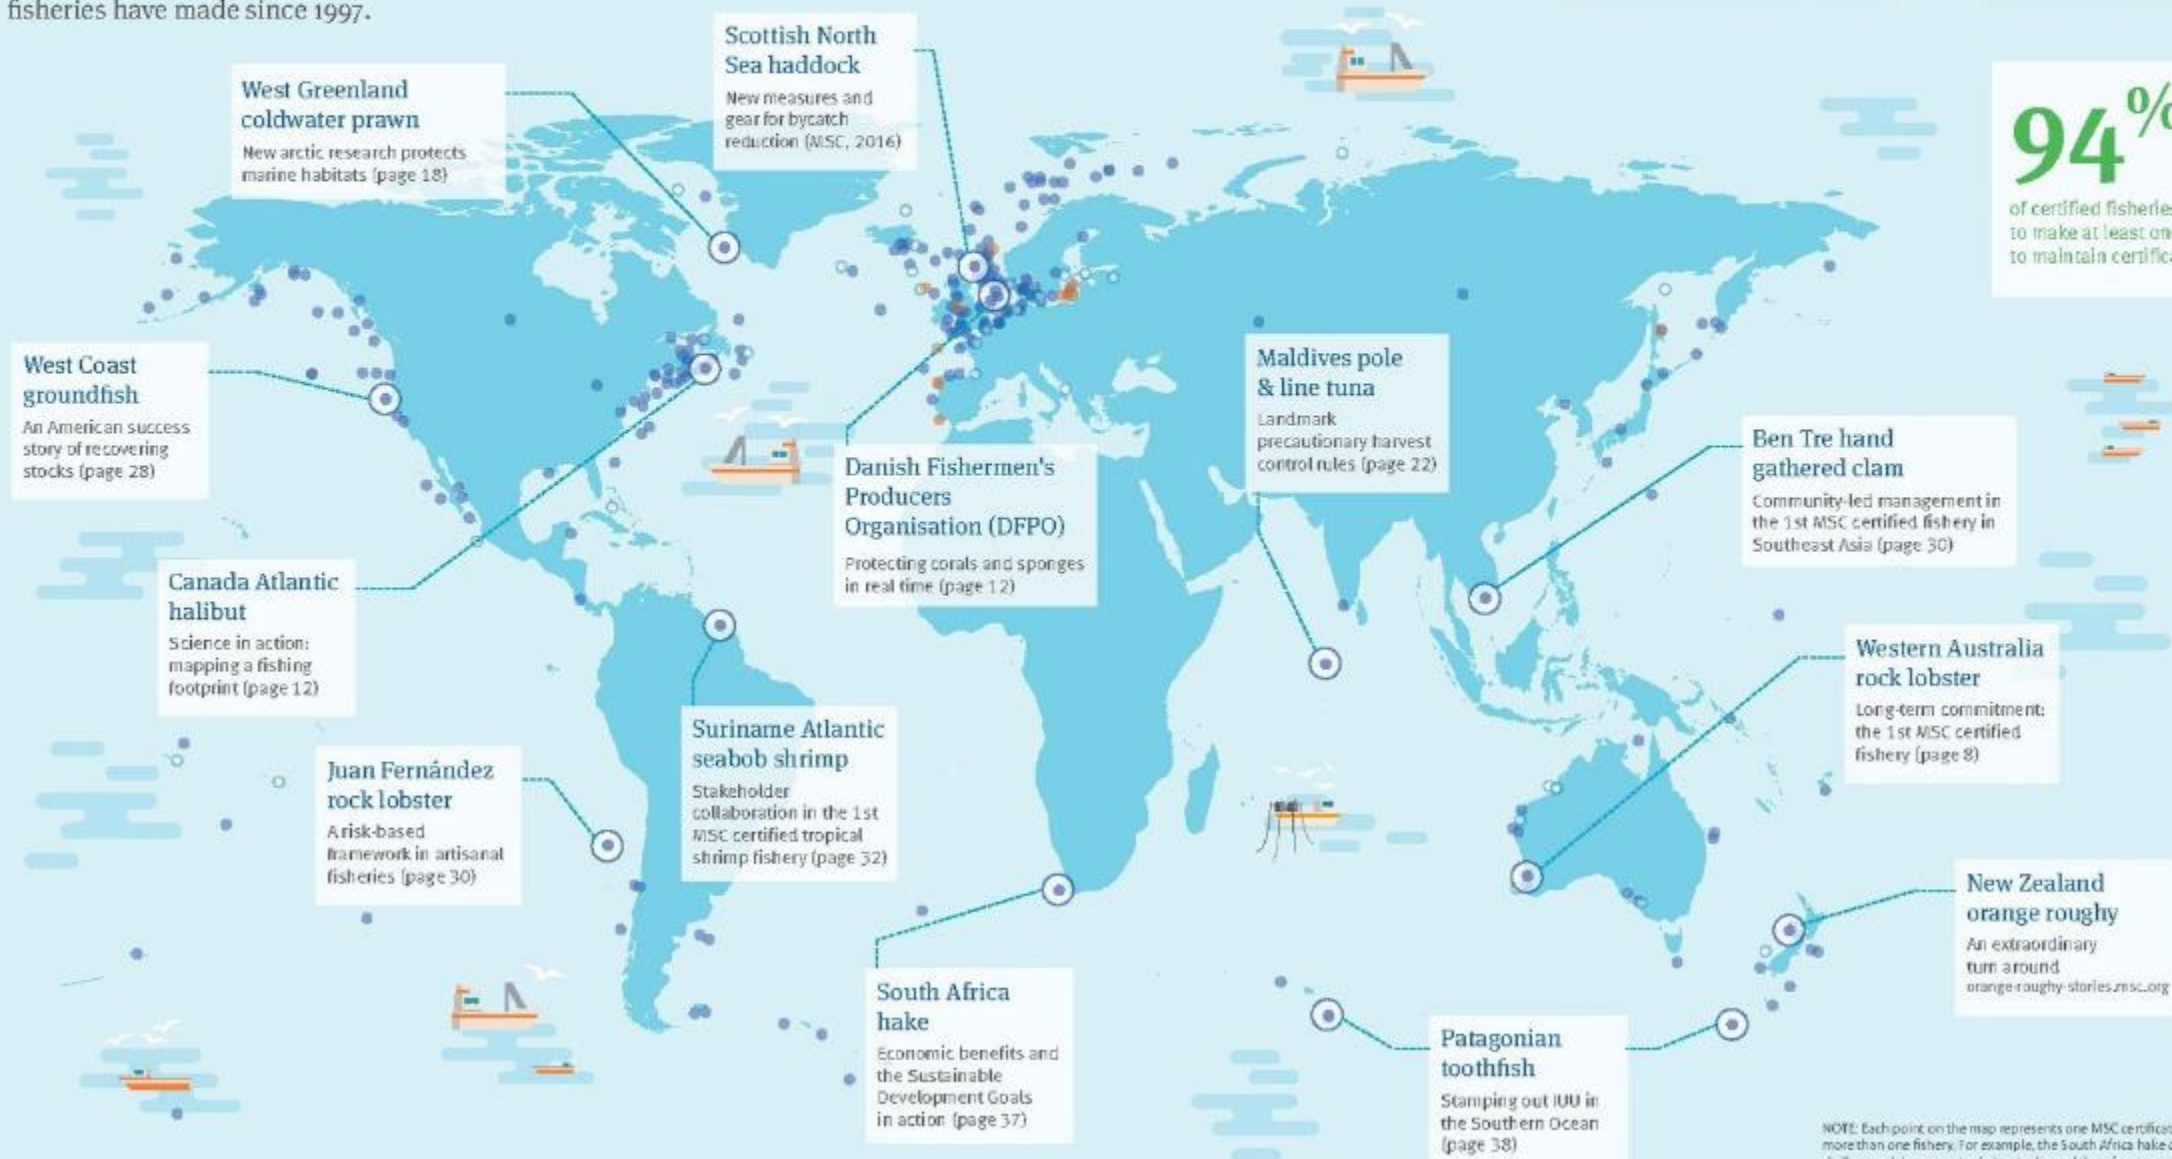

1,238

improvements have been made by certified fisheries

- 296 Certified fisheries
- 67 Fisheries in assessment
- 17 Suspended fisheries

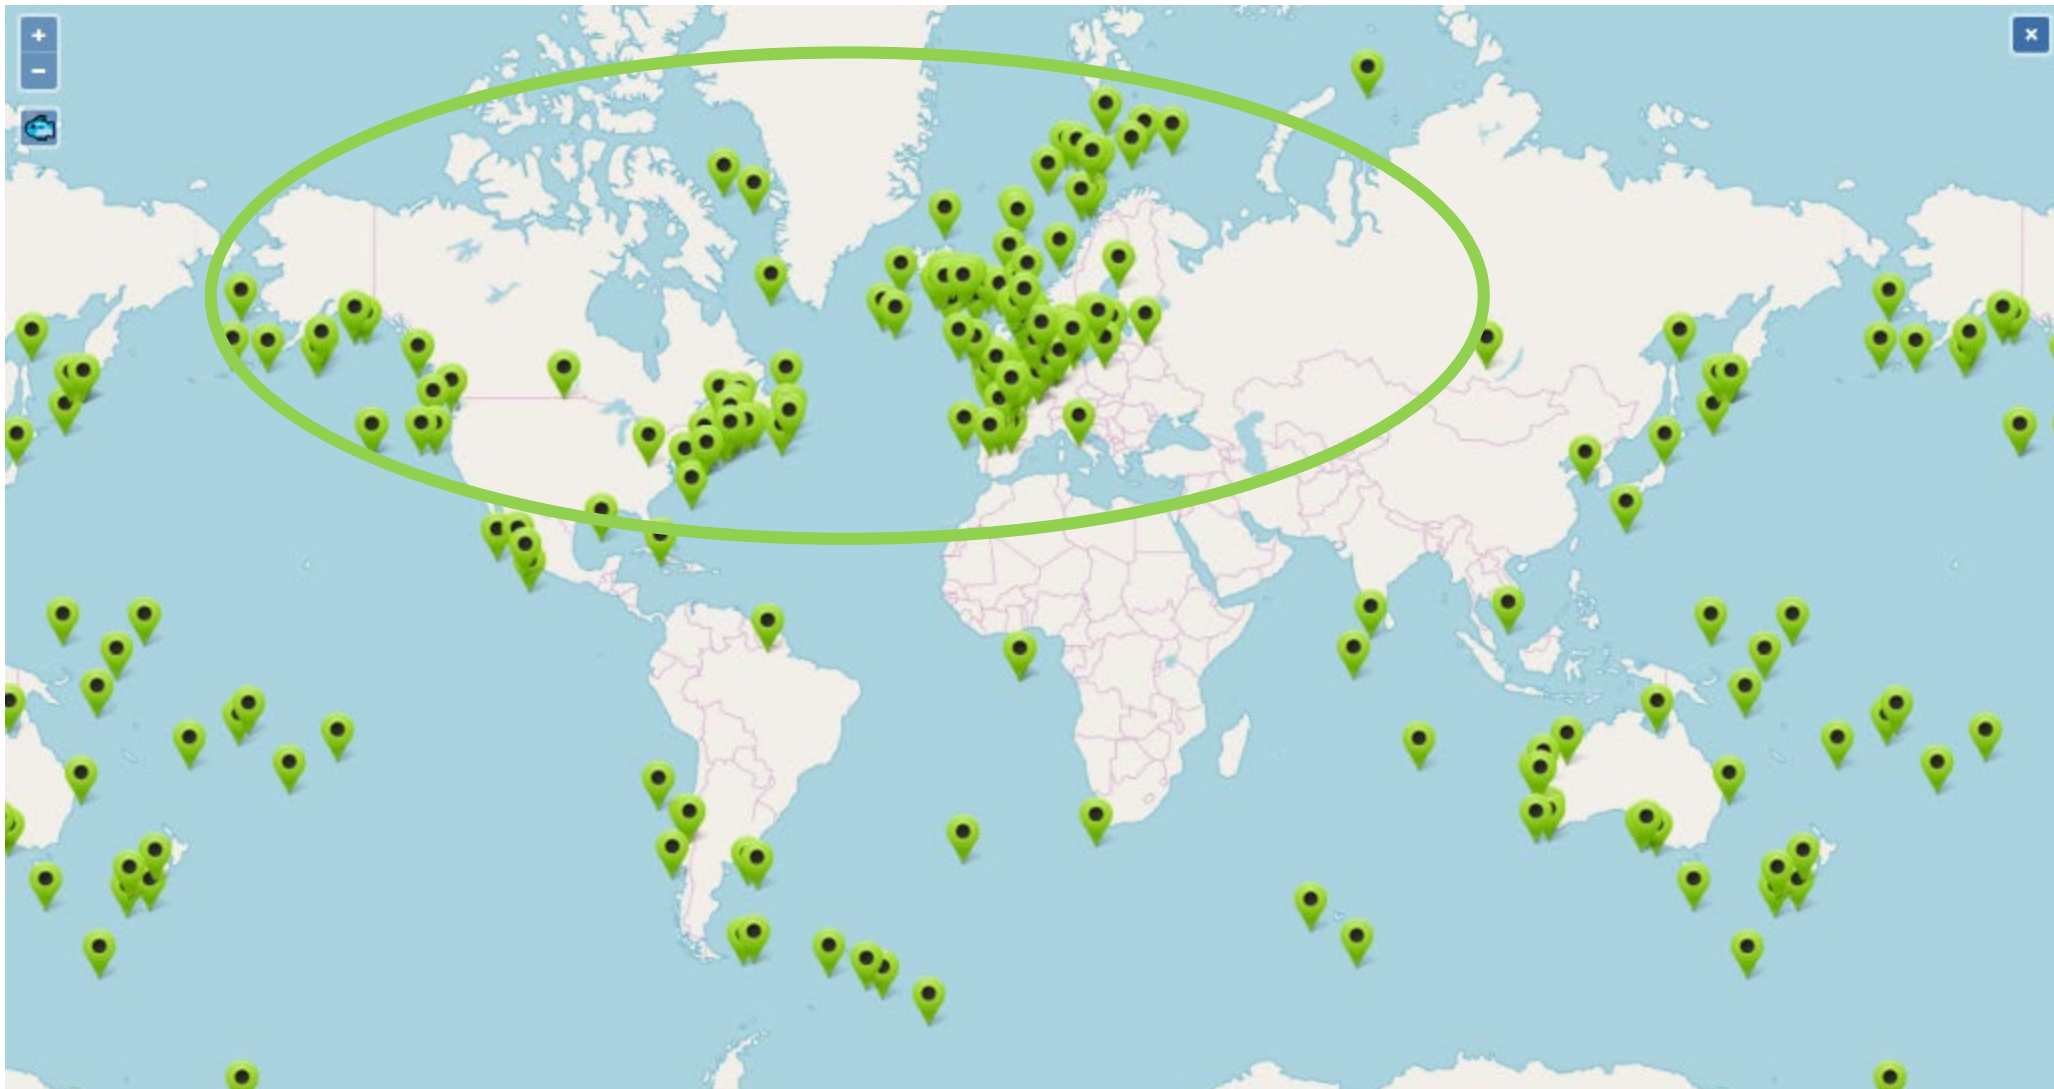

94%

of certified fisheries are required to make at least one improvement to maintain certification

NOTE: Each point on the map represents one MSC certificate. Certificates may cover more than one fishery. For example, the South Africa hake certificate includes both

MSC vottaðar veiðar og í aðalmati

Shaping the MSC program

Be part of our movement to address important sustainability challenges. This website offers you the opportunity to help transform the sustainability of the world's seafood market. You can find out which program improvements we are making, how they are progressing — and participate.

The Marine Stewardship Council (MSC) works with scientists, fisheries, seafood producers, conservation groups and governments to promote sustainable fishing and safeguard seafood supplies for the future. We offer the world's leading certification and ecolabelling program for sustainable fishing and supply chain traceability.

At the heart of our program are the Fisheries and Chain of Custody Standards. They provide the seafood industry with a framework to fish sustainably. To ensure the MSC Standards remain relevant to industry practices and keep pace with new scientific understanding, they are reviewed regularly.

Current improvements

MSC-ASC Seaweed Standard

The Aquaculture Stewardship Council (ASC) and the MSC are working to develop a Seaweed Standard. [Find out more >](#)

Labour Practices

The MSC is working on options for greater assurance that certified fisheries and supply chain companies meet international norms for labour practices. [Find out more >](#)

In Transition to MSC

A new program is currently being developed to recognise fisheries that are committed to improving sustainability towards MSC certification. [Find out more >](#)

Fisheries program items

The MSC Fisheries Standard promotes equal access for wild capture fisheries. [Read about all current improvements >](#)

Chain of Custody program items

The MSC Chain of Custody Standard

Vision, 2030
aspiration and
2020 goal:

2020 goal

20% of global marine catch comes from MSC certified or engaged fisheries, supporting productivity and resilience in globally important marine ecosystems

2030 aspiration

More than a third of global marine catch certified or engaged by 2030. MSC is a leading catalyst for improved fisheries management and market transformation, contributing to the sustainable use of our oceans, supporting resilience, food security and livelihoods
